

# SUPERLINK 6

## Software for data collection and analysis for optimal climate control

- ✓ Central collection of data from climate controllers and fertilizer mixers from all compartments
- ✓ Set-up the overview main menu and see your preferred data from different compartments
- ✓ Calendar function for planning of future actions
- ✓ Central control and change of set-points of installed units
- ✓ Easy change between cultures by use of your own stored plant recipes
- ✓ Report generator for documentation and analysing of growth conditions
- ✓ Quick and easy export of data for your own or consultant's use
- ✓ Your own naming of e.g. heating valves, windows, screens etc.
- ✓ Possible to add set-points to a favourites list

### Optimise the use of resources and get the best growth conditions

SuperLink 6 is an advanced PC program with a graphic user interface, and it is easy to set-up. It provides an easy and reliable control of all climate controls and fertilizer mixers from DGT by Senmatic, and it gives you the full overview by data collection and reuse of data. The program offers many new facilities and options for collection of climate and fertilizer data.

### Central control

SuperLink 6 makes it easy and fast to read and adjust the conditions in various departments, as all information can be shown in and controlled directly from a central computer in the company. SuperLink 6 guarantees the best possible utilization of our advanced equipment for controlling climate, irrigation and fertilization.

## SPECIFICATIONS / SUPERLINK 6

### Which SuperLink versions can be updated for the SL6?

The SL6 is a Windows 32-bit system and as the SL4 and SL5 run on the same system, they can both be updated to SL6.

SL2 runs on DOS 16-bit and SL3 runs on Windows 16-bit, and therefore neither of the two previous versions can be updated to SL6.

### Units compatible with SuperLink 6 based on Zenon version 8.10

- LCC2 touch
- LCC4
- AMI Penta irrigation & fertilizer mixer
- Remote alarm
